Where It All Began

Baxsy didn't appear out of thin air. It's the product of over two decades of manufacturing know-how. Sportage was founded back in 1998, long before 'custom apparel' became a buzzword, quietly supplying uniforms and workwear to some of Australia's most recognised organisations. Then came OC Apparel in 2018, bringing a sharper eye for design and a direct-to-market approach.

When the opportunity came to bring these two businesses together under one roof, the answer was obvious. Baxsy was born, and not just as a rebrand, but as a genuine upgrade to the market. Providing a better website, better systems, better materials, and better service, to truly become a manufacturer that competes on a global scale while staying rooted in the Australian community.

Scale That Doesn't Sacrifice Quality

Today, Baxsy's factory produces over one million units per year, working with more than 2,800 clients across Australia and beyond. The names on that client list speak for themselves: Qantas, BHP, CBA, BMW, Mercedes-Benz, Melbourne University, the Australian Government, Sydney Airport, Woolworths, and Coles, to name just a few. And yet, despite that scale, the team running it is 20 people who genuinely care. Unlike a lot of other suppliers, here there is no bloated middle management or tricky ordering systems. What sets us apart is that we keep things simple. From start to finish, it's what we do best!

What You Can Expect From Us

When you open this catalogue, you're looking at more than just products. You're looking at a manufacturing partner. Baxsy offers fully customisable

apparel with in-house printing, which means tighter turnaround times, fewer handoffs, and consistent results. Standard print jobs can move through in about as little as five days, and for larger orders, we put you at the front of the queue.

Every piece in this catalogue is something we stand behind. From classic tees and polos through to bomber jackets and puffer styles. It's all here, all customisable, and all produced with the same standard of care we've been building for nearly 30 years.

The Reborn Range: Making It Count

One of the things we're most proud of is Reborn, our line of apparel crafted from 100% recycled materials. It's not a token gesture. It's a certified commitment to producing garments that are better for the planet without compromising on the look or feel that your customers expect. Full certification details are available on our website.

Giving Back Is In Our Name

We've always believed that if you have the capacity to help, you use it. That's shown up in the way we operate. Whether it's clothing donations to local schools, or shipping thousands of garments overseas following natural disasters like the 2023 earthquake in Turkey, Baxsy has never seen giving back as optional.

Baxsy is here to do things properly. Properly made, properly priced, and built with the Australian people in mind, whether that's the businesses we supply or the communities we're part of. Thanks for picking up this catalogue... we hope what's inside speaks for itself.

Sincerely,
Frank Geng - Founder

004

Surf Tee

UNISEX
XS-5XL | 190GSM
100% Combed Cotton

190gsm mid-weight fabric for softness and structure.
100% combed cotton for a smooth, breathable hand-feel.

Urban fit silhouette for a modern, streamlined appearance.

HOW TO MEASURE CHEST SIZE

Decoration Options

Embroidery

Uses needles to create a textured, durable, and premium look, ideal for logos on hats, polo shirts, and jackets.

Digital-Transfer (DTF)

A modern method that works on various fabrics (cotton, poly, blends) with high-quality, vivid, and durable results.

Direct-to-Garment (DTG)

Ideal for high-detail, colorful designs (like photos) on cotton. Good for small batches and on-demand printing.

Screen Printing

Best for large orders, simple designs, and cost-effective bulk production. Durable and vibrant, but not suitable for detailed photos.

Dye Sublimation

Ideal for synthetic, white-colored fabric/polyester. It uses heat to transfer dye as gas, leaving no feel, allowing for all-over, vibrant designs.

Heat Transfer Vinyl (HTV)

Uses a vinyl cutter to cut designs, which are then applied via heat press. Excellent for simple, custom, single-color graphics like names or numbers.
